DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is unclear as to whether the Applicant intends to claim the latch indication apparatus in combination with the car seat and the stroller. On line 1, Applicant defines a "latch indication apparatus **for** strollers and car seats to be installed on a stroller frame which has an anchor dock." As written the Applicant does not positively claim the stroller or the car seat. But he does include the car seat and stroller as part of the invention on line 3. Does Applicant intend to claim just the "latch indication apparatus" or the entire combination of the latch indication, car, seat, and stroller? The problem language in claim 7 is that of "an anchor dock fastened to the stroller frame" on line 3.

The aforementioned problem renders the claims vague and indefinite. Clarification and/or correction is required.

Claim Rejections - 35 USC § 102

Art Unit: 3636

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Meeker (U.S. Patent No. 4,634,177).

Meeker teaches the structure as claimed (See Figures 1-5 and the specification, and especially column 2, lines 26-37 for the "latch indication apparatus").

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hotaling et al (U.S. Patent No. 6,089,653).

Hotaling et al teach the structure as claimed (See the specification, and especially column 13, lines 44-67 and column 14, lines 1-5 for the "latch indication apparatus").
